

PX SERIES FUEL CELL HUMIDIFIERS

FOR LOW PRESSURE SYSTEMS

PRODUCT DESCRIPTION

The Px Series is a planar membrane humidifier designed for low-pressure, low-temperature applications requiring high transfer efficiency. It is a fully passive device – with no moving parts and requiring no external power supply – and can be operated in either gas-to-gas or liquid-to-gas mode.

ADVANTAGES

- For lower pressure 1 to 10kW systems
- Counter-flow Plate Design
- Stand-alone membrane cartridges available
- Low cost, high-volume manufacturing
- Low pressure drop
- Liquid-to-gas operation possible
